

### **SIGOS extends its Global Service Network**

A recently-signed Co-operation between Cegelec Solutions & Services and SIGOS Systemintegration GmbH guarantees a maximum of service and extremely reliable local support to SIGOS customers.

Cegelec's international presence in over 50 countries worldwide and 26.000 members of staff underpins and facilitates the existing SIGOS international network, ensuring that the same high standard of quality, services and support is available at every customer location around the world.

With Cegelec's large number of worldwide offices, SIGOS customers will increasingly benefit from local services such as:

- Installation and rollouts of new systems and extensions
- Support, in various languages, with optional 24/7 access
- Local stocks, offering fast components exchange

Mr. Franz Venschott, Cegelec Vice President Telecommunication stated:  
"Companies often underestimate the importance of a strong and comprehensive international network to meet their customer's requirements. With today's competition more often excellent, fast and reliable service is the decisive factor. A permanent customer support has always been very important to SIGOS. Today Cegelec proudly extends this network with new hubs."

Operators and global enterprises, such as Airbus, Philips, Bayer, Alcatel, and many more, already benefit from Cegelec's experience in fields including GSM/UMTS installations, Automated Control Systems, Analysis Systems, commissioning, network maintenance and management.
